

How to Build a Liquid Stage or Dance Floor

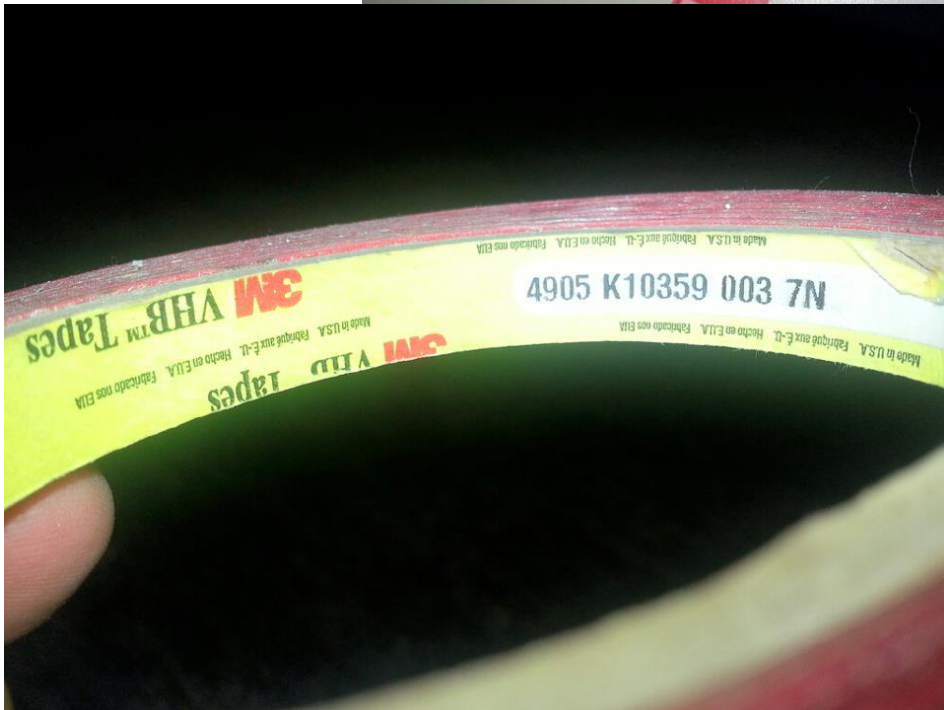

First construct your stage or platform. If you are going direct to the floor skip this step.

Step two Bottom Layer colored plastic 1/8" thick

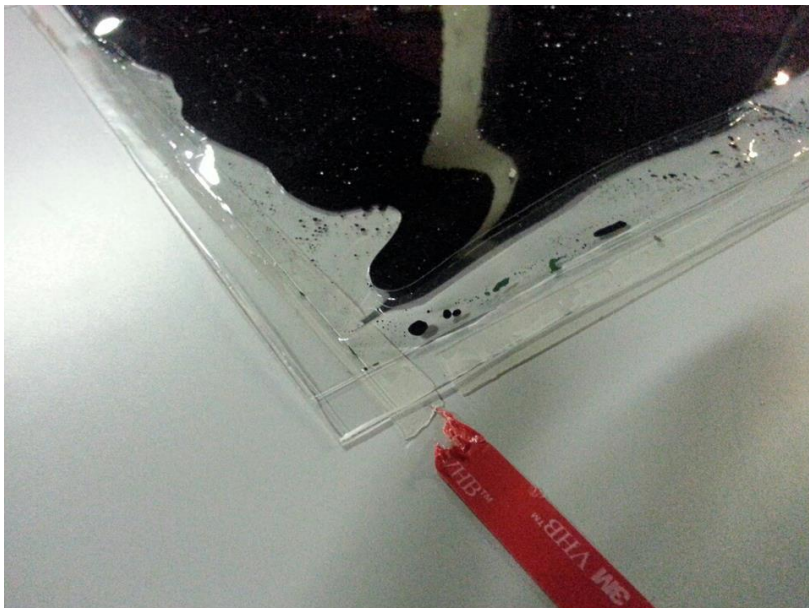

Step three lay down 3M VHB tape where the gel packs will be placed. See more photos below.

Step Four Lay down Gel Packs

Shown 40" x 40" or 1 Meter Square tiles

Step Five Remove Plastic top protective sheet.

Then cut the top layer with a router to match the colored plastic base.

Use any kind of finish trim you wish.

Your Finished Liquid Stage
